DETAILED ACTION

1. Applicant's election without traverse of Group I, drawn to a dressing tool(claims 1-26), in Paper No. 6 is acknowledged.

2. Claims 27-53 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made without traverse in Paper No. 6.

3. Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 9 depends from claim 8, which limited the ceramic material to the recited oxides, nitrides, and carbide. However, claim 9 recites tungsten carbide, which was not included among the choices of ceramic materials set forth in claim 8.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

5. Claims 1-2, 5-7, and 10-16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Billett. Billett discloses a dressing tool comprising all of the subject matter set

forth in applicant's claims above. Note stainless steel or carbide substrate coated with a polycrystalline diamond layer having an array of projections.

6. Claims 1-26 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Myoung et al(US 6439986). Myoung et al discloses a dressing tool comprising all of the subject matter of applicant's claims above. Note various embodiments of dressing tool comprising a substrate of ceramic or metallic material with a pattern of projections coated with a carbonaceous layer of diamond. With regard to claim 2 the height of the "poles" on an intended workpiece is not limiting on the apparatus.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Garretson is cited to show a conditioning disk comprising diamond projections on a stainless steel substrate. Hayashi et al, and Sung et al are cited to show conditioning tools comprising diamond or CBN formed on a metal substrate. Takahashi et al is cited to show a dressing tool having plural projections coated with diamond.

8. Any inquiry concerning this communication should be directed to Robert Rose at telephone number (703) 308-1360.
